

TELECOMS AWARDS 2017

BroadForward

Best Diameter Routing
& Interworking Specialists

BroadForward named Best Diameter Routing & Interworking Specialist of 2017

BroadForward wins the 2017 TMT Telecoms Awards, recognized as leading technology innovator

Amersfoort, The Netherlands, April 28th, 2017

TMT News today announced today that BroadForward has been awarded Best Diameter Routing & Interworking Specialist in the annual Telecom Award category. TMT News provides latest information to tens of thousands of online readers from across Technology, Media and Telecom (TMT) sectors, exploring every aspect: from legislation changes to the latest deals, new product launches to appointments and everything in between. The TMT-News annual Telecoms Awards are designed to reward and recognize leading service providers and technology innovators in the vital and dynamic Telecoms sector.

The online magazine provides insights from the leaders in the industry, from the CEOs of major corporations to the dealmakers themselves, outlining in their own words what they have to offer the TMT industry.

The nomination by TMT News is for the achievements of BroadForward and especially honors the market success of the BFX Interface Gateway, a network signaling solution that provides any-to-any protocol interworking, routing and GUI based services orchestration across Mobile, Fixed, Wi-Fi, IMS, M2M, Number Portability and IT. BFX is designed from the ground up as a software solution, supporting network virtualization, NFV/SDN, OpenStack and cloud deployment.

Steven van Zanen, Head of Product Management and Marketing of BroadForward commented: "This award is yet another recognition for our growing profile in the signaling domain. Our BFX product delivers the perfect fit with next generation networks, supporting the increased Diameter complexity on the road to 5G. BFX offers a cost-effective solution to support services such as VoLTE, VoWiFi and M2M/IoT. In addition, BFX helps our customers to enable the transformation to all-IP networks across access network types and legacy protocols".

About BroadForward

BroadForward is the leading expert in signaling interworking and routing for 2G, 3G, 4G/LTE, IMS, Fixed, Wi-Fi and M2M networks. BroadForward's BFX Interface Gateway is *the* Next Generation signaling solution that provides a unique combination of any-to-any protocol interworking, routing and GUI based services orchestration, working across Diameter, RADIUS, SS7 and IT protocols. BroadForward's solutions are hardware-agnostic, supporting network virtualization and cloud deployment. BroadForward was founded by an internationally recognized team of mobile telecoms experts with a track record in building carrier-grade, revenue generating products and services for global mobile operators. BroadForward's software development is entirely done in The Netherlands. For more information: www.broadforward.com
