AinaCom adopts the BroadForward Next Generation Diameter Signaling Controller (DSC)

Finland's largest virtual network operator AinaCom deploys the BroadForward Diameter router to enable a multi HSS/HLR environment.

Amersfoort, November 13th 2018

AinaCom, a leading Finnish service provider and innovator of enterprise ICT solutions, today announced it has deployed the BroadForward Diameter router to enable a multi HSS/HLR environment.

Ainacom is Finland's largest virtual operator (xVNO) and also serves as a mobile virtual network enabler (MVNE). It offers voice, mobile, network and IT solutions for Finnish enterprise customers.

The BroadForward DSC provides a software designed, multi-protocol routing and interworking solution supporting Diameter, SS7, SIP, ENUM, RADIUS and HTTP. The BroadForward DSC is widely adopted by leading global Mobile Network Operators, MVNOs and IPX providers. The DSC solution empowers BroadForward's customers to independently orchestrate converged signaling scenarios across 2G/3G, 4G/LTE, Fixed/Wi-Fi networks and ultimately 5G. AinaCom has deployed the BroadForward DSC to enable Diameter routing (DRA), Diameter Edge Agent (DEA) and HSS front-end services.

Tomi Saario, CEO at AinaCom, commented "The BroadForward DSC provides AinaCom with intelligent routing and interworking capabilities. Our team is now able create advanced signaling scenarios for our services."

Taco Schoute, CEO BroadForward added "The BroadForward DSC is designed to empower service providers such as AinaCom to focus on innovation without being held back because of typical vendor dependencies. With the BroadForward DSC in place, AinaCom has already enabled routing and interworking scenarios that go far beyond what a typical Diameter router can support. The unique flexibility of the BroadForward DSC enables AinaCom to create advanced services for their customers, independently and out-of-the-box."

About AinaCom

AinaCom Oy is the largest virtual operator in Finland and an innovator of business ICT solutions. AinaCom provides optimally tailored IT and communications solutions, such as voice, mobile, network and IT solutions. AinaCom is part of Aina Group, whose business areas are media and ICT. About BroadForward

BroadForward is leader in intelligent routing and interworking software for 2G/3G, 4G/LTE, 5G, IMS, Fixed, Wi-Fi, IPX and M2M networks. BroadForward delivers a portfolio of Next Generation signaling products and network applications, offering products for routing, interworking, security, number portability and signaling orchestration. BroadForward's active 5G roadmap supports service providers with their network transition to Next Generation Core, with HTTP/2 Proxy, Binding Support Function (BSF), Security Edge Protection Proxy (SEPP), 4G-5G interworking and multi-protocol signaling orchestration. All BroadForward products are hardware-agnostic and support network virtualization, OpenStack and cloud deployment. BroadForward's software development is entirely done in The Netherlands.
